## BUSINESS

We are focused on developing software applications and solutions using the latest technology, and web and mobile solutions in payment processing, trade finance, capital growth, and B2B and B2C markets, to solve major issues such as compliance, banking, digital payments, transaction management and marketing for commercial enterprises. Among our solutions are to provide:

- an FDIC insured crypto stablecoin,
- automated compliance,
- automated billing,
- automated taxes,
- blockchain transparency and tracking, and
- branding and marketing support for the end-users.

Our core product will be DoKT (an acronym for “Dollar Kept Token”), a stable-coin product for industry participants facilitating the transfer of cash in a digital format. This product “creates” the ability for participants to get their revenues into the banking system.

We intend to create Canncoin Tokens which, as a security token, will be an ERC20/223 token built on the Ethereum Blockchain and function as a revenue token eligible to benefit from the transactions on the CannCo Network platform. The tokens will receive a revenue share of the transactions that occur within the Cannco Network. The Canncoin, if and when issued, will receive a share of revenues created through the fees generated by DoKT.

There have been many notable mergers, acquisitions, IPOs and successful exits in the technology industry over the last 2 years. The early transactions have been with the “first to market” participants. We believe the next wave of transactions will be with a more sophisticated and complex group of participants that have learned from the “first to market” group. Targeting this next wave, we are creating a valuable platform as it will have data, knowledge, and defensible long term revenue streams, all that will drive an attractive future.

- A. Describe any subsidiaries, parents, or affiliated companies, if applicable, and a description of such entity's business, contact information for the business, officers, directors, managers or control persons. Subsidiary information may be included by reference

We have one wholly-owned subsidiary, Growth Circle, Inc. Its contact information is the same.

- B. Describe the issuers' principal products or services, and their markets

Our core product will be DoKT (an acronym for “Dollar Kept Token”), a stable-coin product for industry participants facilitating the transfer of cash in a digital format. This product “creates” the ability for licensed participants in the cannabis industry to get their revenues into the banking system.

We intend to create Canncoin Tokens which, as a security token, will be an ERC20/223 token built on the Ethereum Blockchain and function as a revenue token eligible to benefit from the transactions on the CannCo Network platform. The tokens will receive a revenue share of the transactions that occur within the Cannco Network. The Canncoin, if and when issued, will receive a share of revenues created through the fees generated by DoKT.

The Company has issued 1,000,000 shares of Convertible Preferred Series A Shares. These shares are convertible into 1 share of stock. These shares have voting rights of 100 votes per share.

### What it means to be a minority holder

As a minority holder you will have limited ability, if at all, to influence our policies or any other corporate matter, including the election of directors, changes to our company's governance documents,

additional issuances of securities, company repurchases of securities, a sale of the company or of assets of the company or transactions with related parties.

## **Dilution**

Investors should understand the potential for dilution. The investor's stake in a company could be diluted due to the company issuing additional shares. In other words, when the company issues more shares, the percentage of the company that you own will decrease, even though the value of the company may increase. You will own a smaller piece of a larger company. This increase in number of shares outstanding could result from a stock offering (such as an initial public offering, another crowdfunding round, a venture capital round or angel investment), employees exercising stock options, or by conversion of certain instruments (e.g. convertible notes, preferred shares or warrants) into stock. If we decide to issue more shares, an investor could experience value dilution, with each share being worth less than before, and control dilution, with the total percentage an investor owns being less than before. There may also be earnings dilution, with a reduction in the amount earned per share (though this typically occurs only if we offer dividends, and most early stage companies are unlikely to offer dividends, preferring to invest any earnings into the company).

The type of dilution that hurts early-stage investors most occurs when the company sells more shares in a "down round," meaning at a lower valuation than in earlier offerings.

If you are making an investment expecting to own a certain percentage of the company or expecting each share to hold a certain amount of value, it's important to realize how the value of those shares can decrease by actions taken by the company. Dilution can make drastic changes to the value of each share, ownership percentage, voting control, and earnings per share.

## **RESTRICTIONS ON TRANSFER**

The common stock sold in the Regulation CF offering, may not be transferred by any purchaser, for a period of one-year beginning when the securities were issued, unless such securities are transferred:

- (1) to the Company;
- (2) to an accredited investor;
- (3) as part of an offering registered with the SEC; or
- (4) to a member of the family of the purchaser or the equivalent, to a trust controlled by the purchaser, to a trust created for the benefit of a member of the family of the purchaser or the equivalent, or in connection with the death or divorce of the purchaser or other similar circumstance.

## **SIGNATURES**

Pursuant to the requirements of Sections 4(a)(6) and 4A of the Securities Act of 1933 and Regulation Crowdfunding (§ 227.100-503), the issuer certifies that it has reasonable grounds to believe that it meets all of the requirements for filing on Form C and has duly caused this Form to be signed on its behalf by the duly authorized undersigned, on May 31, 2018.

**Geopulse Exploration, Inc.**  
**Notes to Consolidated Financial Statements**  
**December 31, 2019**

**NOTE 1 – NATURE OF OPERATIONS** Geopulse Exploration, Inc. was formed on August 13, 2004 ("Inception") in the State of Nevada. The financial statements of Geopulse Exploration, Inc. (which may be referred to as the "Company", "we," "us," or "our") are prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The Company's headquarters are located in Los Angeles, CA. The Company has one wholly-owned subsidiary, Growth Circle, Inc., and does business as CannCo Brands & Development. CannCo Brands is aimed at building and leveraging new technologies to support emerging economies and markets, such as the legal cannabis market. CannCo is developing a proprietary blockchain technology which will power and support a network of infrastructure partners for legally operating cannabis businesses throughout the United States and Canada.

**NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

*Use of Estimates*

The preparation of financial statements in conformity with U.S. GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, and the reported amount of expenses during the reporting periods. Actual results could materially differ from these estimates. It is reasonably possible that changes in estimates will occur in the near term.

*Fair Value of Financial Instruments*

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants as of the measurement date. Applicable accounting guidance provides an established hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs that market participants would use in valuing the asset or liability and are developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions about the factors that market participants would use in valuing the asset or liability. There are three levels of inputs that may be used to measure fair value:

- Level 1 - Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 - Include other inputs that are directly or indirectly observable in the marketplace.
- Level 3 - Unobservable inputs which are supported by little or no market activity.

The fair value hierarchy also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

Fair-value estimates discussed herein are based upon certain market assumptions and pertinent information available to management as of September 30, 2019 and 2018. The respective carrying value of certain on balance-sheet financial instruments approximated their fair values.

#### *Cash and Cash Equivalents*

For purpose of the statement of cash flows, the Company considers all highly liquid debt instruments purchased with an original maturity of three months or less to be cash equivalents.

#### *Revenue Recognition*

The Company will recognize revenues from advertising, production and consulting services when (a) persuasive evidence that an agreement exists; (b) the service has been performed; (c) the prices are fixed and determinable and not subject to refund or adjustment; and (d) collection of the amounts due is reasonably assured.

#### *Income Taxes*

The Company applies ASC 740 Income Taxes ("ASC 740"). Deferred income taxes are recognized for the tax consequences in future years of differences between the tax bases of assets and liabilities and their financial statement reported amounts at each period end, based on enacted tax laws and statutory tax rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized. The provision for income taxes represents the tax expense for the period, if any and the change during the period in deferred tax assets and liabilities.

ASC 740 also provides criteria for the recognition, measurement, presentation and disclosure of uncertain tax positions. A tax benefit from an uncertain position is recognized only if it is "more likely than not" that the position is sustainable upon examination by the relevant taxing authority based on its technical merit.

The Company is subject to tax in the United States ("U.S.") and files tax returns in the U.S. Federal jurisdiction and Nevada state jurisdiction. The Company is subject to U.S. Federal, state and local income tax examinations by tax authorities for all periods in the last 3 years. The Company currently is not under examination by any tax authority.

#### *Concentration of Credit Risk*

The Company maintains its cash with a major financial institution located in the United States of America which it believes to be creditworthy. Balances are insured by the Federal Deposit Insurance Corporation up to \$250,000.
